

## NEW PRODUCT RELEASE

For immediate release: June 25, 2010

### **Another Industry First: OEM Alternative Cartridges for Lexmark X264xn, X363dn, X364dn/dw**

**WOODLAND HILLS, Calif. — ILG** (International Laser Group) is the first OEM alternative remanufacturer to offer OEM alternative cartridges for **Lexmark X264dn/X363dn/X364dn/X364dw: X264A11G** (Blk), with a 3,500 page yield.

Lexmark X264dn/X363dn/X364dn/X364dw series multi-function printers offer an array of time-saving and cost-saving features for small workgroups. All machines are equipped with 4-in-1 scan, copy, fax and print capability.\*

ILG's reliable and easy-to-install OEM alternative toner cartridges match OEM page yield and performance. ILG's premium quality toners are 100% guaranteed.

ILG is the North American quality leader in toner cartridge manufacturing and offers an extensive line of Lexmark alternative products in both monochrome and color. ILG is the only company in the world with JUMBO COLOR®. Every ILG cartridge is tested to ensure excellent color quality imaging and sharp high-density print results. We test print over 3 million pages per month and conduct multiple pre and post production tests as part of our quality assurance program.

For more information contact ILG directly at 800-937-2880 or visit [www.ilglaser.com](http://www.ilglaser.com).

\* The Lexmark X363dn is a 3-in-1 multi-function machine with scan, copy and print capability. The X363dn does not include fax capability.
