

International Laser Group (ILG) Offers A Complete Line of Brother-Compatible Supplies

July 1, 2005

Woodland Hills, CA - International Laser Group (ILG), an industry-leading manufacturer of premium imaging products, now offers a full line of Brother-compatible laser supplies. The recent addition of their DR500-compatible drum completes ILG's already strong product offering for Brother printers. The company now offers both toner cartridges *and* replacement drums for over 50 of Brother's most popular printers, including those currently on the market like the HL-5140, HL-5150 and HL-5170.

Unlike other compatible manufacturers, ILG has been able to successfully duplicate the bold black color of Brother toner. Where other cartridges pale in comparison, documents printed with ILG toner appear identical to those printed with a Brother cartridge.

Brother's line of laser printers is incredibly popular. The SOHO market finds them appealing, because they are affordably priced and designed to decrease the cost of printing. Instead of an all-in-one, they use separate drum and toner cartridges. This design saves users money, since drums typically last two to three times longer than toner.

"Most compatible supplies manufacturers offer only the toner cartridge for these printers, and are either slow-to-market, or simply never offer the replacement drums," states Joe Shulman, COO. "Brother's monochrome printers have a surprisingly large install-base. There's a gold mine out there that is currently being ignored, and our customers can cash-in on it by filling the gap."

Since the company's creation in 1988, International Laser Group has become one of the world's top private-label, contract manufacturers and distributors of compatible printer and fax cartridges. With strategically located warehouse and distribution centers throughout the United States, ILG is able to offer Next-Day Delivery anywhere in the nation.
