

## International Laser Group (ILG) Announces Complete Line of Brother-Compatible Supplies

*March 2006*

*Woodland Hills, CA* - International Laser Group (ILG) now offers toner cartridges and replacement drums for more than 100 Brother laser printers and fax machines. The recent release of ILG's TN-350 compatible toner cartridge completes their already-strong product offering for Brother machines. The manufacturer now offers compatibles for all the most popular Brother supplies, including the DR200, DR250, DR400, DR500 and DR510 drums, as well as the TN-250, TN-460, TN-560, TN-570, TN-5000PF, and now the TN-350\* toner cartridges.

"Brother toner is notoriously difficult to color-match," states Joe Shulman, COO. "ILG's engineers have been able to perfectly duplicate the strong, bold, black print provided by Brother toner. We are pleased that we can offer Brother-compatible supplies that are truly comparable to the OEM."

ILG's increased focus on its Brother-compatible product line is a response to the rising popularity of Brother's laser printers. These affordably priced printers have been designed to decrease the cost of printing. Brother's use of separate drum and toner cartridges enables maximum use of the drum (which typically lasts two to three times longer than the toner), while cutting the cost of printing since the customer is not forced to replace the drum each time the toner runs out.

Most of these ILG-manufactured products are available in the company's revolutionary Gravity-Free Packaging, a ground-breaking, light-weight packing material that provides increased cartridge protection and even reduces shipping weights.

Since its formation in 1989, ILG has grown to be among the top 10 private-label contract manufacturers of compatible laser, inkjet and fax replacement cartridges. Equipped with the industry's most advanced manufacturing equipment and a highly-regarded reputation for superior product quality, ILG serves as one of the nation's premier beta-test sites for advances in cartridge chip technology, toner formulation, and other aftermarket innovations. Private-labeling is offered free-of-charge, and custom packaging is available upon request.
