

## **International Laser Group (ILG) Releases Brother DR-500 Compatible Drum**

*August 2006*

*Woodland Hills, CA* - International Laser Group (ILG), one of the industry's oldest manufacturers of premium imaging products, is proud to announce the release of their DR-500 compatible drum for Brother HL-1650, HL-1670N, HL-1850, HL-1870N, HL-5040, HL-5050, HL-5070N, MFC-8420 and MFC-8820 printers.

ILG's new DR-500 compatible drum works seamlessly with the company's Brother TN-560 compatible toner cartridge, and provides over 20,000 pages of OEM-quality print. As with all ILG-manufactured products, the DR-500 is required to pass multiple quality assurance tests, and is guaranteed to perform as well or better than the OEM.

ILG has always taken a leading roll in the Brother-compatible market. The manufacturer currently offers both toner cartridges and replacement drums for over 100 Brother printers and fax machines. "We expect our DR-500 drum to become one of our most popular Brother-compatible products, possibly equaling the demand of our DR-200, DR-250 and DR-400 drums," states Gary Michaels, Founder & CEO.

Brother's laser printers are exploding in popularity and demand for supplies is hot. Brother's use of separate drum and toner cartridges enables maximum use of the drum (which typically lasts two to three times longer than the toner), while cutting the cost of printing since the customer is not forced to replace the drum each time the toner runs out.

ILG has built a reputation for making Quality its #1 priority, and offering world-class customer support that is second to none. Founded by the Michaels family in 1989, the company remains the oldest American remanufacturer to be continuously owned by one family. ILG's revenues are approaching \$50 million annually, and the company boasts one of the lowest employee turnover-rates in the industry. Today, International Laser Group has become one of the world's top private-label, contract manufacturers of compatible Laser Toner Cartridges, MICR Toner Cartridges, Inkjet Cartridges and Thermal Transfer products.
