

International Laser Group (ILG) Releases Brother DR-510 Compatible Drum

September 2006

Woodland Hills, CA - International Laser Group (ILG), America's oldest and continuous privately owned manufacturer of premium compatible imaging products, now offers a full line of Brother-compatible laser supplies. Their newly released DR510-compatible drum completes ILG's already strong product offering for Brother printers. The company now offers both toner cartridges and replacement drums for over 50 of Brother's most popular printers, including those currently on the market like the DCP-8040, HL-5140, HL-5150, MFC-8220 and MFC-8440.

Brother toner is notoriously difficult to color-match. ILG engineers have succeeded in flawlessly matching the bold, robust black print provided by the OEM cartridge. Documents printed with ILG toner appear virtually identical to documents printed with an OEM cartridge.

Brother's line of laser printers is incredibly popular. The SOHO market finds them appealing, because they are affordably priced and designed to decrease the cost of printing. Instead of an all-in-one, these printers use separate drum and toner cartridges. This design saves users money, since drums typically last two to three times longer than toner.

"We are pleased to offer a full line of Brother-compatible drum and toner cartridges," states Joe Shulman, Vice President "Most compatible supplies manufacturers offer only the toner cartridge for these printers, and are either slow-to-market, or simply never offer the replacement drums."

Since the company's creation in 1988, International Laser Group has become one of the world's top private-label, contract manufacturers and distributors of compatible printer and fax cartridges. With strategically located warehouse and distribution centers throughout the United States, ILG is able to offer Next-Day Delivery anywhere in the nation.
