

## International Laser Group (ILG) Releases Lexmark X642e Cartridge

*December 2006*

*Woodland Hills, CA* - International Laser Group (ILG), one of America's oldest continuously family-owned contract manufacturers of compatible laser, inkjet and fax replacement cartridges, is pleased to announce the release of their compatible laser toner cartridge for the Lexmark X642e, X644 Series and X646 Series printers.

ILG's X642e cartridge features ISO 9002 certified graphics-grade toner and provides a minimum yield of 21,000 pages of print, which exactly equals the OEM's specifications for the X644H21A, X644H01A and X644H11A cartridges. As with all ILG products, the X642e cartridge undergoes rigorous QA testing, and is backed with a 100% Quality and Satisfaction Guarantee.

"This product is absolutely guaranteed not to leak," says Gary Michaels, President and CEO. "Each component is meticulously analyzed and tested to ensure the best performance. Every cartridge is subjected to post-production testing. Additionally, we pull finished goods off the shelves at random for life-cycle and field simulation testing. Our in-house analysis has revealed that ILG's Lexmark-compatible product line holds up just as well or better than the OEM during shipment."

Founded in 1988 by Cindy and Gary Michaels, ILG prides itself on making Quality its #1 Priority and on providing customer service that is second to none. Armed with the industry's most advanced manufacturing equipment, and a rigorously trained technical staff that is STMC certified, ILG has earned a reputation for quality and innovation. The company's corporate philosophy of offering superior products and customer satisfaction at exceptional pricing has made ILG one of the world's top private-label, contract manufacturers and distributors of compatible printer and fax cartridges.
