

International Laser Group (ILG) Releases Lexmark E120 Compatible Cartridge

February 2007

Woodland Hills, CA - International Laser Group (ILG), one of America's oldest continuously family-owned contract manufacturers of compatible laser, inkjet and fax replacement cartridges, is pleased to announce the release of their compatible laser toner cartridge for the Lexmark E120 Series printers.

ILG's E120 cartridge features ISO 9002 certified graphics-grade toner and provides a minimum yield of 2,000 pages of print, which exactly equals the OEM's specifications for the 12035SA and 12015SA cartridges. As with all ILG products, the E120 cartridge undergoes rigorous QA testing, and is backed with a 100% Quality and Satisfaction Guarantee.

"Producing reliable Lexmark-compatible cartridges is tricky," explains Joe Shulman, Vice President. "The cartridge design makes them inherently fragile during shipment. ILG's Research & Development Department has developed and implemented innovations that stabilize the cartridge. Our in-house testing has shown that ILG's Lexmark-compatible line holds up just as well as the OEM during shipment."

Founded by the Michaels family in 1988, ILG has become one of the world's top private-label contract manufacturers of compatible imaging products. The company's world-class manufacturing facility produces more than 75,000 cartridges per month, and boasts a defect rate of less than 1%. With ILG's three distribution centers strategically located throughout the United States, the manufacturer is able to provide next day delivery at ground prices anywhere in the nation. Private-labeling is offered free-of-charge, and custom packaging is available upon request.
