

International Laser Group (ILG) Announces Xerox Phaser 5400 Compatible Cartridge

March 2007

International Laser Group (ILG), the veteran manufacturer of premium quality compatible printer, fax and multi-function cartridges, announced the release of its compatible 113R00495 cartridge for Xerox Phaser 5400 Series laser printers.

"I believe our product offering for Xerox printers is the most extensive in the industry," notes Joe Shulman, Vice President. "This is our second Xerox-compatible release this year, and we have three more in Research & Development. We now offer cartridges for over 100 Xerox printers."

ILG's Phaser 5400 cartridge offers a print-yield of over 20,000 pages, which exactly equals the specifications for the OEM cartridge. ILG's cartridge features a long-life drum and ISO 9002 certified graphics-grade toner, and has been engineered to provide crisp copy and smooth greyscale transitions on every print. As with all ILG manufactured products, the Phaser 5400 cartridge undergoes rigorous testing against stringent QA specifications. Each component is meticulously analyzed and tested, ensuring that every ILG cartridge meets or exceeds OEM performance standards.

Founded by the Michaels family in 1988, ILG has become one of the world's top private-label contract manufacturers of compatible imaging products. The company's world-class manufacturing facility produces more than 75,000 cartridges per month, and boasts a defect rate of less than 1%. With ILG's three distribution centers strategically located throughout the United States, the manufacturer is able to provide next day delivery at ground prices anywhere in the nation. Private-labeling is offered free-of-charge, and custom packaging is available upon request.
