

International Laser Group (ILG) Announces LaserJet P2015 Cartridge

June 2007

International Laser Group (ILG), the veteran manufacturer of premium quality compatible printer, fax and multi-function cartridges, announced the release of its compatible Q7553A cartridge for the HP LaserJet P2015 printer.

Released in December of 2006, the LaserJet P2015 printer series is HP's replacement for their popular LaserJet 1320 series. Targeting the SOHO market, the LaserJet P2015 features increased speed and lower per-page costs than its predecessor.

With ILG's new Q7553A-compatible cartridge, users can enjoy even lower per-page costs without sacrificing quality. "Our in-house testing has shown that our P2015 cartridge provides the same crisp copy and smooth grey-scale transitions as the OEM, while matching and often exceeding the OEM's yield specification of 3,000 pages," says Joe Shulman, Vice President.

ILG's release of their LaserJet P2015 cartridge comes fast on the heels of their LaserJet P3005 cartridge release last month, and is an example of ILG's continued focus and investment in R&D. Over the last six months the company has released cartridges for the HP Color LaserJet 4700 and 4730mfp, Dell Color 3100 and 5100, Brother HL-5240, Lexmark X642e and E120, and Xerox Phaser 3150, 4500 and 5400 printers, and is scheduled to release cartridges for the Color LaserJet CP4005 this month.

Founded by the Michaels family in 1988, today ILG is a manufacturing powerhouse. Armed with the industry's most advanced manufacturing equipment, and a rigorously trained technical staff that is STMC certified, the company has earned a reputation for producing reliable, leak-free cartridges that provide high margins to the reseller and significant savings for the end-user. With four distribution centers located strategically throughout the United States, the company is able to offer rapid, cost-effective delivery anywhere in the nation.
