

ILG (International Laser Group) Announces Brother DR-520 Compatible Cartridge

September 2007

Woodland Hills, CA – ILG (International Laser Group), a top-five compatible imaging products manufacturer with distribution centers strategically located in every major geographic region of the United States is proud to announce the release of their DR-520 compatible drum.

“ILG has always taken a leading roll in the Brother-compatible market,” states Joe Shulman, Vice President. “The DR-520 compatible drum completes our product offering for Brother machines. ILG now offers both toner cartridges and drums for all the popular Brother machines on the market.”

Brother machines use separate drum and toner cartridges enabling maximum use of the drum (which typically lasts two to three times longer than the toner), while cutting the cost of printing, since the consumer is not forced to replace the drum each time the toner runs out. The DR-520 drum partners with the TN-580 toner cartridge and is compatible to eleven popular Brother laser printers and multi-function machines including the HL-5240, HL-5250, HL-5270, HL-5280, MFC-8460, MFC-8860 and MFC-8870 printers.

ILG’s DR-520 compatible drum provides over 25,000 pages of print, which exactly equals Brother’s specifications. As always, ILG backs their newest drum with a rock-solid 100% satisfaction and performance guarantee.

Founded in 1988, ILG offers an extensive selection of Laser Toner Cartridges, MICR Toner Cartridges, Inkjet Cartridges and Thermal Transfer products for all the most popular printers, fax and multi-function machines. Equipped with the industry’s most advanced manufacturing equipment and a highly-regarded reputation for product quality, the manufacturer serves as one of the nation’s premier beta-test sites for advances in cartridge chip technology, toner formulation, and other aftermarket innovations.
