

## International Laser Group (ILG) Releases LaserJet 5200 and M5025mfp Cartridges

December 2007

Woodland Hills, CA – ILG (International Laser Group), a top-five compatible imaging products manufacturer with distribution centers strategically located in every major geographic region of the United States is proud to announce the release of their compatible Q7516A and Q7570A cartridges for HP LaserJet 5200 printers and M5025mfp and M5035mfp series machines.

ILG's compatible Q7516A cartridge for LaserJet 5200 series printers yields 12,000 pages, while their Q7570A-compatible cartridge for LaserJet M5025mfp and M5035mfp series machines yields 15,000 pages exactly equaling HP OEM specifications. These new ILG cartridges feature ISO 9002 certified graphics-grade toner, and provide the same crisp copy and smooth grey-scale transitions as their OEM counterparts. As with all ILG manufactured toner cartridges, they are tested against stringent quality assurance standards and backed with a 100% Quality and Satisfaction Guarantee.

The LaserJet 5200 series of network-ready, wide-format monochrome laser printers is HP's replacement for their LaserJet 5100 series. The new series features automatic two-sided printing and offers A4 and wide-format A3+ capabilities in a single machine. They are ideal for oversized documents such as engineering designs, CAD drawings and marketing collateral proofs. The LaserJet M5025mfp / M5035mfp series are the multi-function machine versions of the LaserJet 5200 printers.

"These two Hewlett-Packard series of machines are the leaders in their class for large format black and white printing," explains Joe Shulman, VP of Operations. "The OEM cartridges both sell for over \$170 in major office supplies stores, so there are great margins for ILG dealers offering our products!"

Founded by the Michaels family in 1988, today ILG is a manufacturing powerhouse. Armed with the industry's most advanced manufacturing equipment, and a rigorously trained technical staff that is STMC certified, the company has earned a reputation for producing reliable, leak-free cartridges that provide high margins to the reseller and significant savings for the end-user.
