

## International Laser Group (ILG) Releases Canon 106 Compatible Cartridge

January 2008

International Laser Group (ILG), a 20 year pioneer in the compatible cartridge manufacturing industry, announced the release of its Canon 106 compatible laser toner cartridge for ImageClass MF6500 Series multi-function machines.

The compatible Canon 106 (0264B001AA) cartridge from International Laser Group offers a print-yield of 5,000 pages exactly matching Canon's OEM specifications. It features ISO 9002 certified graphics-grade toner, and provides the same crisp, clean copy and smooth grey-scale transitions as its OEM counterpart. As with all cartridges manufactured by International Laser Group, it is tested against stringent quality assurance standards and backed with a 100% Quality and Satisfaction Guarantee.

"Our Canon 106 compatible cartridge is quickly becoming one of our most popular product introductions," notes Joe Shulman, Vice President. "I'm pleased to say that our initial sales projections for this product proved to be too conservative. ILG dealers are reporting phenomenal success with this product."

Introduced last year, Canon's ImageClass MF6500 series of machines combines copy, print, fax and scan capabilities all in one device. These machines provide consumers with a range of high-performance options including network capability, two-sided paper handling and the ability to copy, print and scan from two sided original documents to automatically produce two sided output documents.

Founded in 1988 by Cindy and Gary Michaels, International Laser Group prides itself on making Quality its #1 Priority and on providing customer service that is second to none. The company was one of the first and is now one of the largest manufacturers of compatible printer, fax, copier and multi-function machine cartridges. With distribution centers strategically located in every major geographic region of the United States, the company is able to offer rapid, cost-effective delivery anywhere in the nation.
